# REPORT OF THE TRUSTEES.

CITY HOSPITAL,  
BOSTON, Jan. 1, 1868.

TO THE CITY COUNCIL:

In compliance with the ordinance establishing the Board of Trustees of the City Hospital, the following is respectfully submitted as their Fourth Annual Report, it being for the year ending Dec. 31, 1867.

The number of patients admitted to the Hospital is considerably in excess of last year, while those treated as out-patients have largely increased in each department.

The business for the year has been as follows:

Patients in Hospital, Jan. 1, 1867 . . . . .	163	
Admitted		
Surgical . . . . .	687	
Medical . . . . .	690	
Ophthalmic . . . . .	83	
Small-pox . . . . .	74	
	<u>1,534</u>	
		1,697
Discharged . . . . .	1,410	
Died . . . . .	146	
	<u>1,556</u>	
Remaining . . . . .		<u>141</u>
Largest number of patients in Hospital at any one time .	194	
Smallest number of patients in Hospital at any one time .	100	
Daily average number of patients in Hospital . . . .	135	
Surgical Out-patients . . . . .	2,823	
Medical " . . . . .	2,274	
Ophthalmic " . . . . .	1,918	
Total . . . . .	<u>7,015</u>	

## Number of Visits of Out-patients :

Surgical . . . . .	4,108
Medical . . . . .	4,550
Ophthalmic . . . . .	17,745
Total . . . . .	<u>26,403</u>

The accompanying report of the Superintendent gives a detailed statement of cases treated, and also a careful account of the expenditures of the year.

The increase of patients together with the cost of water by meter, and the large orders by the Professional Staff for extra diet, owing to the extremely debilitated state of many under their charge, has caused the expenses, notwithstanding the reduced price of fuel and a portion of the supplies, to exceed the cost of maintaining the Hospital the previous year. The table giving the average cost in detail of articles purchased will show that due care has been exercised in that respect, and the internal management has been conducted by the Superintendent with the greatest economy, consistent with the welfare and comfort of the inmates.

The estimated expense of the Hospital for the next financial year is as follows :

Supplies . . . . .	\$42,250 00
Salaries and Labor . . . . .	18,500 00
Fuel . . . . .	10,000 00
Furniture . . . . .	1,000 00
Buildings and Grounds . . . . .	7,250 00
Medical Supplies . . . . .	6,000 00
	<u>\$85,000 00</u>
Estimated income from Pay-patients . . . . .	<u>\$6,000 00</u>

In making their estimate, the Trustees, after looking carefully at the expenses of the last year, and exercising their best

judgment regarding the market prices likely to rule during the coming season, have made allowance for such increase of patients as, after conference with the local authorities, they think may reasonably be expected to seek the benefits of the Hospital from Roxbury, whose residents, by the Act of Annexation, will so soon have claims upon our Public Institutions. They have been moderate in computing this number, thinking it wiser, if their estimate shall be exceeded in fact, that a further appropriation shall then be asked of the City Government than that an amount should now be called for that might be in excess of the real needs of the Hospital.

The estimated amount for buildings and grounds is larger than heretofore, and requires some explanation. It includes, in addition to the ordinary yearly expenses, the cost of a new steam-boiler for heating; the substitution of brass pipes, for the hot water, in place of those of lead now in use, and alterations in the ice-house. During the extreme cold weather of the present winter, it has been found that the three boilers were taxed to their utmost to warm the various wards, and if at such a time one of them should by any accident become temporarily useless, great suffering and perhaps loss of life would ensue.

Such an accident has already occurred, but it was during the summer when repairs could easily be made without trouble to the inmates. When the Hospital was erected, the foundation was laid for a fourth boiler in anticipation of its necessity; and the Trustees are decidedly of the opinion that it would be unsafe to attempt to run another winter without this addition to the means of heating the buildings. A considerable item of annual expense has been the plumbing made necessary by leaks and breakages occurring in the lead hot water pipes, the cost for the past year being over five hundred dollars; a small amount of brass pipe has been in use two years without any repairs being needed, and as the expense of such pipes entire for the hot water, will probably not equal the plumbers' bills

paid for the last two years, the Trustees consider that the change would be an economy of expenditure, besides relieving the Hospital from the inconvenience and damage so often experienced under the present arrangement.

The ice-house, as now constructed, is so much affected by the outside atmosphere, that an unnecessary quantity of ice is thereby consumed, and it is proposed to lower the floor so as to admit the introduction of lining cases filled with a non-conducting material. No expenditure is proposed that would not, it is thought, commend itself to the City Government as of essential need for the interests of the Hospital, and dictated by a true spirit of economy.

In the third report of the Board, an appropriation of \$6,000 was asked for special repairs, and with the money thus obtained, the ceilings have been cleansed and whitened, and the Hospital painted inside and out, including the iron fence on Harrison Avenue. The painting has been thoroughly done, and the buildings in this respect are in better condition than when new.

In June 1867, the City Council appropriated \$16,000 for the erection of a building for out-patients in connection with the Porter's Lodge, and in July, the foundations of the Lodge being found in such condition that it was deemed unsafe to build, in connection therewith, an appropriation of \$1,200 was made to take down and rebuild the same; the total amount being \$17,200.

The building is now nearly completed, and will be ready for occupancy in a few weeks; in addition to the accommodation of out-patients, it will prove convenient for coroners' inquests, funerals, etc.

It will be seen by the statistics heretofore given, that the out-patients' department has assumed very large proportions, and is constantly on the increase; this does not add materially to the cost of maintaining the Hospital, as the services of the physicians

and surgeons are gratuitous, and medicines are not furnished by the city, except in cases of actual need.

An incalculable benefit is thus conferred by the medical faculty upon the suffering poor of our city, and many thus provided for would otherwise be admitted to the Hospital, thereby considerably increasing the expense; in fact it can readily be seen that this department is where the greatest number are assisted at the least cost, and it was due to the gentlemen having charge of these patients that they should have the increased conveniences provided by the new building. Clinical instruction has been given to the students of the Harvard Medical School, and lectures delivered at the Hospital twice in each week during the school terms, which have been largely attended, the number of tickets issued this winter being two hundred and thirty.

Early in the year, Dr. Chas. E. Buckingham resigned his position as Visiting Surgeon, on account of ill health, and Dr. George Derby was chosen to fill the vacancy.

In November, a second vacancy occurred in the same department by the resignation of Dr. Algernon Coolidge, and the Trustees are happy to state that the health of Dr. Buckingham having improved, they were able to avail themselves of his services, and he has resumed his post as Visiting Surgeon.

Dr. Derby being elected as Visiting Surgeon, occasioned a vacancy in the position of Admitting Physician, which was filled by the choice of Dr. H. F. Damon.

In July, the number of surgical out-patients having increased so much that the Visiting Surgeons could not, in addition to their regular duties at the Hospital, give the time requisite for their care, the Board created the office of Surgeon to Out-patients, and elected to the position Dr. Francis C. Ropes.

By reference to the statement of Bequests, it will be seen that the claim for damages for land taken by the New York Central Railroad, being a portion of the bequest of Mr. Elisha Goodnow, situated upon Third Street, South Boston, has been settled

and the remainder of the lot sold, thereby adding to the interest-bearing fund \$4,633 $\frac{25}{100}$ .

The appeal of the Trustees, in their last report, for donations to establish a fund, the income to be applied to the purchase of clothing for needy patients, has recently met with a generous response, in the gift of Two Thousand Dollars for this object, by Hon. Otis Norcross, whose connection with the management of the Hospital gave him a knowledge of the great benefit that could thus be conferred upon the poor and unfortunate. It is to be hoped that others may follow the example of Mr. Norcross, and thus aid a truly practical charity.

The circulating library is becoming reduced by wear and tear, and donations of useful and entertaining books are solicited. The medical library has been increased somewhat during the year by gift and by purchase, and now numbers about four hundred and fifty volumes.

There seems to be some misapprehension on the part of many citizens regarding the class of persons for whom the Hospital was intended, and the Trustees are often solicited to admit those who are in such condition as to be beyond hope of cure, and from lack of means, being paupers in the strict sense of the term, seek admission for the purpose of securing a comfortable home until death shall relieve them from their troubles; and it is said by those who are interested in their behalf, that there is no reason for debarring them from this privilege, as the institution is a "Free Hospital," and the expenses thereof are borne by the tax-payers of the city. If this view of the case were correct, a few days would suffice to fill the wards to their utmost capacity, and vacancies would be caused by death only; but the trustees believe that neither the law, nor the intent of the originators, contemplated any such course. The act of the Legislature of 1858 reads as follows:

"The city is hereby authorized to erect and maintain a hospital for the reception of persons who by misfortune or poverty may require relief during temporary sickness."

The ordinance of the city says :

“The City Hospital is established for the reception of those only who require temporary relief during sickness. The Trustees may however admit other persons to the institution temporarily, when necessity requires; but such persons shall be removed to other appropriate public institutions as soon as their condition will permit.” The intent of the government in establishing the Hospital was stated in a report of a Committee to whom was referred that portion of Mayor Rice’s address in 1857, relating to a Free City Hospital, as follows :

“It is, however, proper to state that the term ‘City Hospital’ would probably better express the character and design of the proposed institution than ‘Free Hospital,’ since it appears from the address of the Mayor, and from the general evidence in favor of this establishment, that, while its benefits are intended to be free to those persons of temperate and industrious habits who by sickness or accident require that care and attention for which they are unable to pay, yet, where there is the ability, there is no reason why a just and proper amount should not be received to aid in meeting the expenses of the Hospital, and we have no doubt that many of the patients or their friends would prefer to pay something in proportion to their means, to prevent the feeling that they were the objects of public charity. There is no class in the community in which this sentiment or desire of independence is so strong, as among that class for whose special benefit this Hospital is intended; and it is one which, as the great barrier to pauperism, cannot be too highly commended and encouraged.”

“Hence we would not have this a Hospital for the reception of the degraded victims of vice and intemperance, or a home for the hopeless pauper; but we would have it regarded as an asylum for the industrious and honest mechanic and laborer, who, by sudden injury or disease, is temporarily prevented from laboring for the support of himself and family, and who,

by proper care and medical treatment, may have his sufferings alleviated, and be sooner restored to his health and his family, and enabled to resume his labor."

"We would have it a home to which the respectable domestic may be sent, when struck down by sickness; whose attic chambers cannot be made comfortable, and who cannot receive the requisite attendance, however well disposed may be the family in which she resides. We would open its doors to the stranger overtaken by disease, when absent from friends and home, and to all others among the various classes of society who in sickness require that comfort and medical advice which their means and homes cannot afford."

A Committee, appointed to consider the subject in 1860, used precisely the same language to describe the character of the organization they thought it desirable to establish. It is therefore plainly to be seen, that the city did not have authority to erect or maintain a "Free Hospital" in the broad sense of the term, and that they had no intent so to do, but that they did establish a "City Hospital" for the care and relief, during temporary sickness, of those of its residents, who, until afflicted by disease or accident, were, and on restoration to health, would again become self-supporting: and further, that if able, such persons were to pay for their treatment in proportion to their means; no large amount of income can however be expected from this source, as in most cases when inability to labor comes, wages cease, and the little pittance saved from former earnings is required for the support of the family of the sufferer while deprived of his aid.

Again, the income of the Goodnow Fund, the principal of which is now \$21,133.25, could not be applied under his will to the support of a hospital free to all, as that document distinctly states: "And by such hospital I mean an institution similar to the Massachusetts General Hospital, suitably endowed and properly managed, and not such public hospital as may be

established or maintained in connection with the City Almshouse or House of Correction, or other municipal establishments, or for the care and relief of paupers supported by the city."

The Trustees have gone thus at length into this subject that citizens may understand the objects of the Hospital, and to correct an erroneous opinion that seems to exist to a considerable extent in the community.

In concluding their report, the Board desire to bear testimony to the faithful and devoted efforts of the Physicians and Surgeons, as well as the Superintendent, in all that relates to the welfare and comfort of the inmates, and the success and standing of the Hospital.

## SUPERINTENDENT'S REPORT.

CITY HOSPITAL, Dec. 31, 1867.

GENTLEMEN OF THE BOARD OF TRUSTEES:

I respectfully submit to you herewith a summary of the general operations of the Boston City Hospital for the year 1867, together with an account of the current expenses and statistics for the year, it being my Fourth Annual Report.

The institution has been opened since June 1, 1864. The following table will give the annual and total number of patients admitted.

	1864.	1865.	1866.	1867.	Total.
Patients Admitted . . . . .	475	1,066	1,432	1,534	4,507
Patients visited by Admitting Physician . . . . .	459	1,081	1,278	1,338	4,156
Patients admitted by Admitting Physician . . . . .	231	696	961	959	2,847
Patients admitted by Superintendent . . . . .	115	128	126	247	616
Accidents admitted . . . . .	129	242	345	328	1,044
Number of out-patients treated . . . . .	371	1,143	3,324	7,015	11,853

The number of out-patients who come daily to the Hospital for advice and medicine, in the several departments, are as follows:

Ophthalmic, under the charge of Dr. Williams,	1,918
Surgical,           "       "       "       "       Ropes,	2,823
Medical,           "       "       "       "       Swan,	
Assisted by       "       Gavin,	2,274
Total,	<u>7,015</u>

## FIXTURES AND FURNITURE.

The amount given in my last Report, bearing date  
Dec. 31, 1866, included all the fixtures and fur-  
niture to that date . . . . . \$50,057 72

There has been expended during the past  
year for fixtures and improvements . \$2,914 32  
For new furniture, additional . . . 730 66  
For surgical instruments . . . 450 62  
For books for Medical Library . . 47 60  
For cart, harness, and market wagon . 610 00

4,753 20

Total cost of furniture and fixtures to Jan. 1868 . \$54,810 92

Among the deaths are included the cases of those taken up in the streets in convulsions, or injured from accident on shipboard, railroads, or otherwise, and brought to the Hospital by the Police, often in a dying condition.

All accidents thus brought in are received without reference to the probability of cure. Whatever aid the circumstances demand, is administered. Otherwise, no patients are received whose cases do not appear to admit of cure, or, at least, relief; and these are referred to the admitting physician.

Died in accident-room, without treatment, soon after being brought in, 3.

It will be noticed that the number of patients treated has increased yearly since the Hospital was opened, and during the

last season far in excess of other years; and we trust with a success commendable to the medical faculty connected with the Institution.

From the members of your Board I have continued to receive much encouraging sympathy and support, for which I would renew the expression of my thanks. From the medical staff, the resident officers, and from many other persons who have filled places of responsibility and trust, I have received cordial and efficient co-operation.

Respectfully submitted,

L. A. CUTLER, *Superintendent.*

## RULES OF ADMISSIONS AND DISCHARGES.

---

Applications for admission of patients shall be made at the Hospital on each day of the week (Sunday excepted), between 9 and 11 o'clock, A.M.

Whenever able, the patient shall apply in person. When not able to appear in person, application may be made by a friend, and the patient shall be visited by one of the House Officers, or by some Physician designated by the Trustees.

Any Trustee, or either of the Physicians or Surgeons in attendance, may, in case of emergency, send a patient in the first instance to the Hospital by written permit; and the Visiting Committee shall, on the certificate of one of the medical officers designated for the purpose, decide as soon as may be afterwards whether such patient shall remain.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee for the time being, or, in their absence, to that of the Superintendent.

The Visiting Committee, however, shall have the power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted.

Patients discharged on the recommendation of the Physicians or Surgeons shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved, or not relieved, which certificate shall be signed by the Superintendent.

Patients may be admitted by the Trustees to the privileges of the Hospital, at such rates of board as they may from time to time determine; such board being secured by their friends, or by the authorities of the place to which they belong.

In all cases where, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

## HOUSE RULES.

---

PATIENTS must be in their proper places in the wards during the visit of the Physicians and Surgeons, and always by 8 P. M., unless specially exempted by the Superintendent.

Those free patients who are able, are expected to assist in nursing, and in such other services as may be reasonably required of them.

Patients shall not leave the Hospital Grounds without a pass from the Superintendent, nor their respective wards without the consent of the nurse in attendance.

No patient shall purchase, or cause any member of the household to purchase for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent. Nor shall any officer or servant of the Hospital receive a gift or fee from a patient.

Profane or obscene language, loud talking, and incivility are prohibited.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which, in the opinion of the Physician or Surgeon, are capable of being relieved.

No patient having acute syphilitic disease, or *mania-a-potu*, shall be admitted as a charity patient, or at a lower rate than twenty-five dollars a week for the former, and fifteen dollars for the latter.

Patients may be visited by clergymen of their own selection; and, where there is a wish for the performance of any particular religious rite, it shall be indulged when practicable.

It is expected that patients will implicitly obey the rules of the Hospital. Complaints, for whatever cause, may be made to

the Superintendent or Visiting Committee; and, when reasonable, shall be by them reported to the Trustees.

All employés must be in their respective places during their hours of duty. The doors and gates of the hospital will be closed at 9 $\frac{3}{4}$ , P. M., at which time all are expected to be quiet, and those not on duty, in their own rooms.

The smoking of tobacco is prohibited within the Hospital; also the use of wine and intoxicating liquors, unless prescribed by a physician.

#### VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday, and Friday of each week, from two to three o'clock, P. M., friends may be permitted to visit patients, though no patient shall receive more than one visitor on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

No visitor will be permitted to take any meal in the Hospital, or pass the night therein, without permission from the Superintendent.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to the patients shall be left with the Superintendent.

#### NURSES.

Nurses are required to be in their several wards each morning, ready for duty, before the night watchers leave the same.

Nurses are to decide what clothing or other articles patients are to retain in the ward.

## STUDENTS.

The Trustees may grant any practitioner or student of medicine of one year's standing, on the joint recommendation of the Physician and Surgeon in attendance, a ticket of admission to follow the practice of the Hospital for not more than one year. Before receiving this ticket, the applicant shall sign an obligation to obey in all respects the By-laws and Regulations of the Hospital. The privilege thus granted may be modified or revoked.

No student shall be entitled to admission except at the regular hours for visiting, operation, or lecture.

Every student, when requested, shall show his ticket to the porter at the gate, and shall conduct himself with decorum and propriety. It shall be the duty of the Superintendent to report any infringement of the rules to the Visiting Committee.

## FORM OF APPLICATION.

The form of application for admission shall be as follows :

## BOSTON CITY HOSPITAL.

The undersigned, inhabitant of \_\_\_\_\_ for the last  
and now residing at \_\_\_\_\_ Born in \_\_\_\_\_ being  
\_\_\_\_\_ years of age, by employment a \_\_\_\_\_, married, and ill  
of \_\_\_\_\_, requests to be admitted to the City Hospital.  
Boston, \_\_\_\_\_, 186 .

## CERTIFICATE OF ADMITTING PHYSICIAN.

Having examined the condition of the said applicant, I find it a suitable case for admission to the City Hospital.

\_\_\_\_\_, M. D.

## BEQUESTS.

---

Elisha Goodnow of Boston, by will dated July 12, 1849, makes the City of Boston residuary legatee to his estate, real and personal, for the benefit of a City Hospital. *Provided*, that one-half of the proceeds shall be applied to the establishment and perpetual maintenance of *free beds*, under the control of the government and officers of the said Hospital for the time being.

The following sums of money have been received :

1862, June 9.	From executor's balance of account at Probate Office . . . .	\$623 85
1864, April 14.	Proceeds of sale of estate on Cross Street, containing 6,228 square feet of land . . . . .	\$14,907 12
	Old buildings upon same . . . .	223 00
1864, December 31.	From City of Boston, for 225 square feet of land taken from above estate to widen Cross Street . . . .	523 36
		<hr/> 15,653 48
1864, July 1.	Interest on same from City to this date - - - - -	222 67
		<hr/> \$16,500 00
1867, Nov. 30.	From Boston, Hart- ford and Erie R. R. for 5,167 square feet land taken by New	

York Central R. R. from estate		
on Third Street, South Boston	- - -	3,875 25
1868, January 1. Proceeds of sale		
balance of estate on Third Street,		
South Boston, 1,516 square feet	- - -	758 00
		<u>\$21,133 25</u>

1868, January 1. Of the above amount say \$16,500 is invested in city scrip, dated July 1, 1864, twenty years, interest semi-annually, at six per cent per annum, and deposited with the City Auditor, who is required to receive the interest upon the said scrip, and add the same to the moneys appropriated for the use of the Hospital.

The balance on interest in the hands of the City Treasurer to be invested as above, is \$4,633.25.

1868, January. The \$10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows:—

\$500 to the Penitent Females' Refuge.

\$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

\$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.\*

Lawrence Nichols of Boston, by will dated August 19, 1862, and recorded Suffolk Registry of Wills, vol. 160, fol. 140, bequeathed to the City of Boston, towards the support of a City Hospital, the sum of one thousand dollars.

1863, April 29. The Executor of Mr. Nichols paid the City		
Treasurer \$1,000, less the United States tax		\$937 25
The City of Boston paid interest on same	-	62 75
		<u>\$1,000 00</u>

\* Plans, copy of the will, and other papers, are on file with the Secretary of the Board of Trustees.

1864, July 1. The above amount, say \$1,000, has been invested in City of Boston scrip, dated July 1, 1864, twenty years, with six per cent interest, payable semi-annually, and deposited with the City Auditor, as required by ordinance.

1865, March 14. Received as Residuary Legatee, from the estate of Mr. Nichols, and now in the hands of the Treasurer - - - - - \$530 50

---

1868, January 1. The Trustees have received the sum of two thousand dollars from Hon. Otis Norcross, as the foundation of a fund for the benefit of patients leaving the Hospital, poor and destitute of proper clothing. The principal sum is to be invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing, in which to leave the Hospital, and having no means of procuring it.
